Explanation for Course Creation:*

Throughout the past two years, the COVID-19 pandemic has offered both the academic and administrative an unique opportunity to assess gaps in student instruction and knowledge, as well as evaluate and examine the organization of the curriculum. The creation of this course supplements student instruction in the basic science courses and incorporates the clinical application of imaging in patient history-taking, analysis, and diagnosis.

This course will be placed at the beginning of the students' first year so that they begin with a strong foundation in anatomical structure and function as they progress through the curriculum and build a foundational knowledge base of the basic sciences to apply to clinical presentations of patient ailments.
